

Amazon Badge Verification Log

Name: Ethan Womack

Username: erwomack

Facility: Amazon TPA4, Temple Terrace, FL

Badge Scan Date: July 14, 2025

Issue Summary:

- Blocked entry on Monday morning despite clearance confirmation from HR (Tori) on Friday at approximately 15:30.
- Security cited 24-hour delay for badge reactivation, appeared uninformed of clearance.
- Apparent procedural mishandling and possible attempt to generate a no-show status.
- A to Z app login remains disabled after multiple escalations including IT OPS TECH.

Actions Taken:

- Spoke with Tori and Kishan at HR to resolve I-9 and badge issues.
- Badge in hand with barcode and employee ID (erwomack).
- Multiple images of badge captured for documentation.
- Suspected delay tactics and HR/Security desk dysfunction.
- ADA accommodations and future escalation strategies outlined.

Notes:

- Badge system relies on XRAY and metal detector screening upon exit only.
- Security protocol appears performative; desk personnel unaware of true access hierarchy.
- Future correspondence to route through appropriate legal or oversight channels once benefits and ADA protections are live.
